Magdeburg, Germany*

Symposium on: ENVIRONMENTAL ELECTROMAGNETIC COMPATIBILITY (EEMC)

Symposium Co-chairs: Dragan Poljak, Vesna Roje
University of Split, Croatia (dpoljak@fesb.hr, vroje@fesb.hr)

Call for Papers

Symposium on "Environmental Electromagnetic Compatibility" in the frame of the 30th International Conference on Software, Telecommunications and Computer Networks (*SoftCOM 2022*), technically co-sponsored by the IEEE Communications Society (ComSoc), on September 22 - 24, 2022 in Split, Croatia.

The rapid growth of the telecommunication industry has resulted in an increasing number of various transmitting installations, such as GSM, LTE UMTS, and the related influence on human health has recently become a very hot and controversial issue.

While the message or data-handling processes and computational capabilities are necessary aspects of the mobile and wireless communication systems, the intensity and form of transmitted electromagnetic energy is of the great interest to biological researchers.

The aims of the Symposium are not only related to the modeling of natural electromagnetic interference (EMI) sources, such as lightning, and analysis and design of the protection systems (LPS), but also to the optimization of the radiation sources design and investigating EMC and environmental aspects of new technologies such as IoT antenna design, electric vehicles, Wireless Power Transfer (WPT) or 5G systems dosimetry.

Accepted and presented papers will be published in the conference proceedings, and submitted to IEEE Xplore as well as other Abstracting and Indexing (A&I) databases. Authors of selected papers will be invited to submit an extended version of their manuscripts for publication in a special issue of the [Journal of Communications Software and Systems \(JCOMSS\)](https://jcoms.fesb.unist.hr/).

We cordially invite speakers to present their original contributions in the area of EMC. The topics of interest include, but are not limited to:

- *Advanced Numerical Modeling*
- *Deterministic-stochastic Approaches*
- *Magnetohydrodynamics*
- *Sources of Electromagnetic Interference*
- *Antennas for Mobile Communications*
- *IoT (Internet of Things) Antenna Design*
- *EMC of Electric Vehicles*
- *Ground Penetrating Radar (GPR)*
- *Wireless Power Transfer (WPT)*
- *Lightning and Grounding*
- *Bioelectromagnetics*
- *Dosimetry*

IMPORTANT DATES

Final manuscript due	June 24, 2022
Notification of acceptance	July 1, 2022
Camera-ready manuscript	July 15, 2022
